DETAILED ACTION

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on November 23, 2010 has been entered.

This Office Action is in response to Applicant's request for continued examination (RCE) filed November 23, 2010, and amendment and response to the Final Office Action (mailed August 26, 2010), filed November 23, 2010, wherein claim 21 is amended. Claims 21, 27, 28, and 31-60 are pending and are examined on the merits herein.

The following rejection of record is maintained and modified:

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 21, 27, 28, and 31-36 are rejected under 35 U.S.C. 102(b) as being anticipated by O'Connell et al. (EP 1024145A2, August 2, 2000, PTO-1449 submitted May 12, 2008).

O'Connell teaches 5-O-mycaminosyl azithromycin derivatives [Examples 14-17], particularly the following compound:

This compound anticipates the claims wherein R1 is Et, R2 and R3 are Me and OH, R4 is Me, R5 is Me, R6 is Me, R7 is Me, R8 is the above sugar wherein R10 is H, R9 is Me, R13 is H, R14 is H, and R15 is H.

Response to Arguments

Applicant's amendment, removing the recitation that R16 = OH, was sufficient to remove the rejection with respect to the cited compound in the previous office action. However, upon an updated and more focused search and further consideration of the O'Connell reference, it was found that O'Connell also teaches the above compound which meets the limitations of the claims.

Claims 37-60 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
